EDUCATION

University of Passau

Master of Science, Computer Science

Oct 2025 – Present

Passau, Germany

- Focus area IT Security – completed: Wireless Security, Hardware-oriented Security, IoT Security; currently taking: Advanced IT Security, Machine Learning for Cybersecurity, Dependable Distributed Systems

Adama Science and Technology University

Bachelor of Science, Computer Science and Engineering

Jul 2024

Adama, Ethiopia

- Relevant coursework: Computer Systems Security, Data Communication and Computer Networks, Wireless Mobile Networks, Operating Systems, Distributed Systems, Database Systems

PROFESSIONAL EXPERIENCE

ALKAN CIT

Network Administrator (internships 2022 and 2023, full-time 07/2024 – 11/2024)

2022 – Nov 2024

Addis Ababa, Ethiopia

- Operated and maintained the network infrastructure; troubleshooting, performance and traffic monitoring
- Configured routers and switches; analysed and resolved TCP/IP, DNS and DHCP issues
- Provided user support and ticket handling; implemented security measures and network security protocols
- Set up and administered Microsoft Teams environments for business customers
- Supported the IT team with upgrades and optimisations; trained staff on networking topics

Passauer Neue Presse (Excom)

Production Assistant, Print Finishing

Dec 2025 – Present

Passau, Germany

- Shift-based work in a procedure-driven production environment: reliability, precision and teamwork

PROJECTS

Secure Multi-Site Network Lab

VirtualBox, iptables, WireGuard, OpenSSL, Suricata, rsyslog

Oct 2026

Personal project

- Five-VM, two-site network (LAN, DMZ, WAN) with Linux gateways, stateful default-deny iptables firewalls and egress filtering, verified with nmap
- Site-to-site WireGuard VPN; packet captures show only encrypted UDP on the WAN, while the same traffic is readable without the tunnel
- Private PKI with OpenSSL (root and intermediate CA, SAN certificate, CRL revocation) securing an nginx HTTPS server
- Suricata IDS with 3 custom scan-detection rules (all triggered in tests); central rsyslog collector for logs from 4 hosts

RaSTA Protocol in Rust

Security Engineering Lab, University of Passau

2026

Team of four

- Team implementation of the railway safety protocol RaSTA (DIN VDE V 0831-200): constant-memory, no_std core, no unsafe code
- 181 automated tests (92.8 % line coverage); interoperability with the SBB reference stack verified (five-round Ping/Pong)
- Co-author of the project paper on implementation, verification and interoperability testing

Violence Detection Automation System (VDAS)

Bachelor Thesis, Adama Science and Technology University

Jan 2024 – Jun 2024

Adama, Ethiopia

- Organised and managed the backend server infrastructure and data-processing pipelines for automated alert management

TECHNICAL SKILLS

Security: Network Segmentation, Firewall Policy Design, Public Key Infrastructure (PKI/TLS), Site-to-Site VPN, Intrusion Detection, Packet and Log Analysis

Networking: TCP/IP, Routing, Switching, DNS, DHCP, Stateful Firewalls, VPN (WireGuard), Wireshark, nmap

Systems and Tools: Linux (Ubuntu), Windows, iptables, Suricata, OpenSSL, rsyslog, nginx, VirtualBox, VMware, Docker (basic)

Programming: Python, Java, C/C++, Rust (team project), SQL, Bash, PowerShell

Core Competencies: Troubleshooting, User Support, Technical Documentation, Written Communication

Languages: English (B2, IELTS), German (B1), Amharic (native)

CERTIFICATIONS

- AWS Certified Cloud Practitioner (Amazon Web Services)
- Cisco Networking Academy – CCNAv7 courses completed: ITN, SRWE, ENSA (2022–2023)
- CompTIA Security+ (exam scheduled for 9 October 2026)
